Detailed Practising History

Please note I did not work in Bosnia and Herzegovina or Serbia as a doctor. I also did not do an internship there. I was also never registered with the medical boards in either of these countries. I fled due to the civil war at that time. On moving to Brazil, the local authorities issued me with registration and licence to practice medicine. I completed a residency in Brazil in Cardio-Vascular Surgery; proof of this Residency has been included with my AHPRA application for Limited Registration.
