Department of Health
Launceston General Hospital

RE: Resident Medical Officer (523387) - DiT 2025

Dear Recruitment Team,

I would be honoured to work and learn at the **Launceston General Hospital**. I'm an Australian citizen and an International Medical Graduate; I have Limited Registration with AHPRA and am undertaking a training program at Monash Health until June 2025. Additionally, I hold current certifications in Advanced Cardiac Life Support (ACLS) and Paediatric Advanced Life Support (PALS), both from the American Heart Association, as well as Advanced Trauma Life Support (ATLS) from the American College of Surgeons.

I am eager to learn and adapt to the Australian healthcare system and contribute my skills and experience to your organisation and team. My expertise spans emergency medicine and intensive care, shaped by challenging and diverse environments over 15 years of medical experience in Brazil.

Key competencies and accomplishments include:

- **Emergency and ICU Proficiency:** Managed critical patients at the height of the COVID-19 pandemic in the second most-affected country in the world, performing high-risk procedures such as intubations while fostering collaboration among multidisciplinary teams and communicating effectively and empathetically with staff, patients and their families.
- **Advanced Surgical Training:** Completed a cardiovascular surgery residency under [Professor Domingo M. Braile](#), acquiring mastery in procedures like airway management, central vein line placement, and pacemaker implantation.
- **Adaptability in Diverse Environments:** Worked across regional hospitals and Latin America's largest oncological hospital (ICESP), navigating complex cases and rapidly evolving healthcare demands.

As someone who grew up in the remote countryside and is passionate about providing high-quality care, I am genuinely excited by the prospect of contributing to the **Launceston General Hospital**, the major referral centre for Northern Tasmania, and potentially engaging with rural practice sites across the state. The opportunity to develop my clinical skills across such a diverse range of rotations, from critical care to general medicine and surgery, aligns perfectly with my desire for a well-rounded foundation in my medical career and my commitment to serving communities both in urban and regional settings.

Looking forward to hearing from you,

Deva Subasic de Azevedo
