RE: Intensive Care Registrar

Dear Charterhouse Recruitment Team,

I am an Australian citizen IMG with a passion for genuine patient-centred care and extensive clinical experience in intensive care and emergency medicine. I am following AHPRA's Standard Pathway, currently holding limited registration and undertaking a training program at Monash Health that will lead to level 2 supervision.

I have completed surgical specialisation in Cardio-Vascular Surgery, and hold current certifications in Advanced Cardiac Life Support (ACLS) and Paediatric Advanced Life Support (PALS), both from the American Heart Association, as well as Advanced Trauma Life Support (ATLS) from the American College of Surgeons.

I am eager to learn and contribute my skills and experience to our GV Health Service as an intensive care registrar and undertake any advised rotations. In reflecting upon my expertise founded on 15 years spanning challenging, diverse and dynamic hospital environments, I believe three unique attributes stand out.

- **Monash Health Experience:** Under Monash's MiPrep training program, I have adapted to Australian healthcare practices, including navigating the National Health System, utilising the Cerner EMR for patient documentation and overall shown high competency.
- **Exceptional ICU and ED Proficiency:** Managed critical patients during the peak of the COVID-19 pandemic, in one of the most pandemic-stricken countries, performing high-risk procedures such as intubations while fostering collaboration among multidisciplinary teams.
- **Adaptability in Diverse Environments:** Worked in diverse work environments from large public hospitals, offshore medical clinics and Latin America's largest oncological hospital (ICESP). Thus, demonstrating practical ability to navigate complex cases in rapidly evolving healthcare demands.

Having been born and raised in a small rural town, I understand the unique challenges and deep sense of community that define remote healthcare. It is this connection that draws me to Shepparton and the Goulburn Valley, where I hope to begin the next chapter of my life and career in service of a region that embodies resilience, diversity, and opportunity.

As a doctor and Aussie seeking to build a stable and meaningful future in Australia, I am deeply invested in contributing to the rural Victoria's health system with dedication and humility. I would be truly honoured to be given the chance to prove myself and serve the people of this remarkable region.

Looking forward to hearing from you soon,

Deva Subasic de Azevedo
