This is a recruitment pool for Full Time and Part Time Fixed Term contracts from six to 36 months for appointments commencing February and August 2026, with the possibility of extension(s).

Selection Criteria

Write a statement to address the selection criteria below:

1. Eligible for registration with the Medical Board of Australia.
2. Demonstrated relevant clinical and procedural experience and/or specialty trainee registration.
3. Demonstrated participation in continuing medical education activities to maintain and upgrade knowledge and skills.
4. Demonstrated commitment to safety and quality in healthcare through awareness of safe clinical practice within own limitations, and continuous improvement to patient outcomes.
5. Experience of or interest in experiencing health service delivery and patient care in rural setting.
6. Demonstrated ability to provide education, supervision, training and support to more junior staff.

For enquiries, please contact Medical Recruitment Coordinators for junior doctors,
Michelle and Patricia at WACHSDoctors.Junior@health.wa.gov.au.

Apply now

View the full job listing on MedCareersWA

Applications must be lodged online by 4pm AWST 9 June 2025. Late submissions will not be accepted.

OPEN 12 MAY

Relocation

Subject to conditions, as an Advanced Trainee, you will be eligible for relocation and accommodation allowances.

These relocation and accommodation entitlements can be discussed further at interview and/or appointment stage with each region.

Anaesthesia Service, Bunbury

Six or 12 month full time appointments (80 hours per fortnight) commencing February or August.

For more information

Dr Daniel O'Callaghan
Consultant Anaesthetist
Daniel.O'Callaghan@health.wa.gov.au

Maddison Matthews
Senior Medical Workforce Officer
WACHSSMedicalRecruitment@health.wa.gov.au
0473 943 388

Applications are invited for the position of Anaesthetic Service Registrar within Bunbury Regional Hospital. The Anaesthetic Department is a small but busy department that offers a high-quality experience in anaesthesia. Bunbury Regional Hospital provides consultant lead anaesthetic services for the specialties of general surgery, obstetrics and gynaecology, ophthalmology, urology, orthopaedics, plastics, ear, nose and throat, vascular, emergency and trauma. We also provide a robust labour epidural service and acute pain service to the hospital. Outpatient clinics are also run by the department.

The successful registrars will be required to work with consultants in the efficient delivery of these services. In conjunction with anaesthetic trainees, service registrars will participate in on-call, theatre, clinic and ward duties. Involvement in teaching, research and audit is encouraged in our department. There is ample opportunity to gain good quality and quantity of anaesthetic volume of practice. The successful applicant needs to be well motivated, organised and adaptable to working in a flexible role.

For more information:

[WA Country Health Service - Working at Bunbury Regional Hospital](#)

Anaesthesia Service, Geraldton

Appointments will be 12 months up to three years full time (80 hours per fortnight) commencing February 2026. In this role you will experience rural elective and emergency anaesthesia in a supportive and friendly environment.

This role will be appealing to suitably experienced medical officers interested in further developing their anaesthetic skills in a rural setting or entering anaesthesia training.

The Department of Anaesthesia consists of FANZCA consultants, Rural Generalist anaesthetists, senior medical practitioners and registrars. Registrars are well supported by seniors to provide the full spectrum of perioperative care to adult and paediatric patients across a wide range of surgical subspecialties including but not limited to general surgery, orthopaedics, obstetrics and gynaecology, ear, nose and throat, vascular, and dental. They participate in the 24/7 rosters under appropriate progression of supervision levels and the amount of afterhours. Rostering is flexible and addressing education needs.

The department is accredited by ANZCA for RGA training, and prioritises education needs with weekly education sessions for registrars and at least twice monthly academic meetings for the whole department. Consultants are enthusiastic to deliver formal and informal teaching, and provide constructive feedback to the registrars. The department collaborates with other RGA training sites to provide comprehensive education. There are abundant opportunities on quality assurance activities such as audits.

If applicants for service registrar position are interested in joining the RGA training program, they must meet the eligibility requirements and give an indication of interest in your application cover letter.

The role is not currently accredited by ANZCA and RGA for training but will likely be accreditable in the future. The registrar will be well supported by FANZCA anaesthetists and an engaged GP-Anaesthetist workforce.

Watch our YouTube video on [Anaesthetic Training at Kalgoorlie Hospital](#).

Kalgoorlie Health Campus' Anaesthesia Department is a small but busy operating department with recent accreditation for Rural Generalist Anaesthesia (RGA) training, offering high quality anaesthetic experience across a full range of district hospital specialties including obstetrics and paediatrics.

Applicants must demonstrate a commitment to rural or remote medicine. You will work alongside eight consultant-level independent practitioners (both FANZCA and DRGA) and one registrar and there is ample opportunity to gain good quality and quantity of anaesthetic volume of practice. The successful applicant must be well motivated, organised, and adaptable to working in a flexible role.

The Kalgoorlie Anaesthetic Department provides generalist services across a wide range of settings in the health campus, including the High Dependency Unit which offers great opportunities for exposure to critical care in the RG setting and preparation for a Rural Generalist Anaesthetist.

Kalgoorlie Health Campus is an excellent environment to advance your medical career. The hospital can provide further onward opportunities to base your remaining training in rural generalist medicine and primary care in the community following successful completion of the RGA curriculum.

To be successful to this role:

- Must have AHPRA general registration.
- Must be registered with ACCRM or the RACGP Rural pathway or a fellow of either college (FRACGP or FACRRM).
- Must have demonstrated a clear commitment to rural and remote medicine.
- Must have demonstrated strong commitment to fulfilling training and providing services to the Goldfields region.

Emergency Medicine Trainee, Albany

We are looking for enthusiastic Australian College of Emergency Medicine (ACEM) Trainees who want to combine a great mix of rural and regional medicine with one of WA's best kept secrets in terms of location and lifestyle. Located on the south coast of WA, Albany is a town of approximately 30,000 people with all the amenities of a small city including great restaurants, a state-of-the-art Entertainment Centre and stunning surrounds with some of Australia's best beaches close by. Perth is 420km away, with good air links.

Our Emergency Department (ED) has two resus bays, eight acute cubicles, four fast track cubicles as well as integrated computerised work management and pathology / radiology systems. We also have an ED Short Stay Unit. There is an expanding cohort (currently ten) of committed locally resident FACEMs, whose sub-specialty professional interests include teaching/simulation, ultrasound and research. We have a broad and interesting case mix, which includes all categories of adult and paediatric cases, medical and surgical. Paediatrics make up approximately 20 per cent of our presentations. Major trauma is not uncommon.

During the day, the roster comprises five doctors per shift (including the FACEM) and overnight there are two doctors with FACEM on-call, so there is excellent supervision and apprentice-style learning. The registrar has a segregated five hours of formal education per week. We are accredited for 24 months of Emergency Medicine Training with ACEM.

Successful applicants will have previous emergency medicine experience and must be registered with the Australian Medical Board and registered as a trainee with the Australian College for Emergency Medicine.

We are seeking an enthusiastic service registrars who want to combine a great mix of rural and regional medicine with one of WA's best kept secrets in terms of location and lifestyle. Located on the south coast of WA, Albany is a town of approximately 30,000 people with all the amenities of a small city such as great restaurants, a state-of-the-art Entertainment Centre and stunning surrounds with some of Australia's best beaches close by. Perth is 420km away, with good air links.

Our Emergency Department (ED) has two resus bays, eight acute cubicles, four fast track cubicles as well as integrated computerised work management and pathology / radiology systems. We also have an ED Short Stay Unit. There is an expanding cohort (currently eight) of committed locally resident FACEMs, as well as senior rural generalists whose sub-specialty professional interests include teaching/simulation, ultrasound and research. There is an opportunity to practice airway skills in theatre or complete Prostart as well as undertake GP advanced skills training (AST) in emergency medicine (either RACGP or ACRRM) or EMC/EMD/AEMD. We have a broad case mix, which includes all categories of adult and paediatric cases, medical and surgical. Paediatrics make up approximately 20 per cent of our presentations and major trauma is not uncommon.

The roster comprises five doctors per shift (including the FACEM) and overnight there is two doctors with FACEM on-call, providing excellent supervision and apprentice-style learning. The registrar has a segregated five hours of formal education per week. We are accredited for 24 months of Emergency Medicine Training with ACEM as well as for RACGP and ACRRM.

Emergency Medicine/General Medicine Service, Broome

This position provides an excellent opportunity to develop your emergency clinical skills and grow into senior roles that will be expected of you once you are an independent clinician. This will include, but not be limited to, the opportunity to participate in departmental education sessions, participation in audits, clinical governance and quality improvement projects.

Applicants to this position in Broome may be required to provide services on a “service needs basis” at our wider Kimberley regional hospital sites being Derby, Kununurra, Fitzroy Crossing, Halls Creek and Wyndham. This will provide an excellent opportunity for service registrars to provide care and gain valuable clinical experience.

Successful applicants will work as part of a multidisciplinary team to review the medical needs of patients within Broome Health Campus and provide teaching and support, as appropriate to doctors in training, nursing, allied health and other team members across the service. They will also be expected to share after-hours, evening and night shift with their peers on a pro-rata basis.

We are currently seeking service registrars to provide a high-quality patient centred care to patients under the supervision of the head of department or duty consultant within the Emergency Medicine and General Medicine Departments.

SWMedicalRecruitment@health.wa.gov.au
0473 943 388

FACEM trainees, GP trainees seeking advanced skill training, other college trainees and non-vocationally committed and suitably qualified practitioners are encouraged to apply.

This is an excellent opportunity to experience a wide variety of presentations in a regional setting. As an Emergency Department (ED) registrar you will get unrivalled exposure to “real” emergency medicine (including procedures) within a fully supervised department. If you believe “variety is the spice of life”, then Bunbury could be the place for you!

Bunbury Regional Hospital provides the opportunity for the following:

- Twenty-four months FACEM training ED time - accredited for 10 trainees
- Accredited for ACEM PLB/PER
- Accredited (and highly rated) training rotations to anaesthetics and foundation intensive care unit
- Medical education and simulation SST
- Hands on care for all patients
- Education: protected multi-modal departmental education, grand rounds, in-situ sim, code blue sim and more
- Exam preparation training: protected time (primary and fellowship) - with proven track record of success
- Full access to exam and study leave
- Access to the ACEM EM Certificate, Diploma and Advanced Diploma
- Rural Generalist Training

Applicants must have a minimum of six months experience in Critical Care Medicine (Emergency, Acute Medicine, Intensive Care Unit or Anaesthetics).

Emergency Medicine Service, ACRRM/RACGP Advanced Skills and Advanced Trainee, Geraldton

The ACEM positions are accredited for 6 months as a Rural and Remote Health Special Skills Term and allow trainees to focus on their professional development, decision making and procedural skills acquisition without competition from other trainees.

Opportunities exist to complete half of the term within two non-ED clinical areas such as anaesthetics, obstetrics and gynaecology, or paediatrics, with the opportunity to complete the ACEM 4:10 requirements.

Rostering is flexible and includes education time. The positions allow registrars to focus on their professional development, decision making and procedural skills acquisition. The term is accredited for ACRRM and RACGP for advanced skills placements. There is also the opportunity to complete an ACEM Emergency Medicine Certificate or Intermediate Emergency Medicine Training Program (previously EM Diploma).

Opportunities for ED procedural and airway skills development are available and can be tailored to individual levels of experience. A minimum of 0.5FTE is required for part time positions and some prior experience in ED (at RMO or registrar level) is required.

Registrar positions are available for GP trainees seeking Advanced Specialist Training/Advanced Rural Skill Training, and non-vocationally committed suitably qualified doctors to experience rural emergency medicine in a supportive and friendly environment.

Watch our YouTube video Working as a Registrar at Kalgoorlie's Emergency Department

This position provides an excellent opportunity to develop your emergency clinical skills in a remote/rural setting and grow into senior roles that will be expected of you once you are an independent clinician. This will include, but not be limited to, the opportunity to participate in:

- Departmental education sessions
- Participation in audits
- Clinical governance
- Quality improvement projects
- Rostering is flexible and includes education time

The positions allow registrars to focus on their professional development, decision making and procedural skills acquisition in a friendly and supportive environment.

You will also have the opportunity to work with remote Aboriginal communities and patients in a multidisciplinary team environment with medical, surgical, paediatric and gynaecology and obstetrics services, and the Royal Flying Doctor Service.

Kalgoorlie's Emergency Department is equipped with 17 beds. The High Dependency Unit has five beds.

Emergency Medicine , Northam

This position provides excellent exposure to a diverse range of emergency presentations and procedures while working within a supportive medium-sized mixed adult and paediatric department consisting of FACEMs, highly experienced rural hospitalists as well as junior medical officers seconded from metropolitan hospitals.

To be successful you will need to hold AHPRA registration and demonstrate a minimum of six months experience in Critical Care Medicine (Emergency; Acute Medicine; Intensive Care Medicine or Anaesthetics). This role will be both challenging and rewarding and you will be presented with cases and develop skills that can only come from working in a rural Emergency Department (ED). This position is 12 months fixed term full time.

Northam is an attractive rural town located 100km from the Perth CBD in the picturesque Avon Valley. Northam Health Service is the main hub hospital in the Wheatbelt which is home to approximately 70,000 people and farming communities. The ED sees approximately 15,000 patients per year.

Benefits of working at Northam ED include:

- A broad exposure to issues inherent in rural medical practice.
- Adequate levels of supervision compared to metropolitan sites which will encourage clinical leadership and foster independent practice.
- Opportunity to be involved in the education of medical students from the rural clinical school in Northam and junior medical officers.
- Option to work 1 FTE wholly at Northam Health Service or split with St John of God Midland Hospital (for example, 0.5 at each site).
- Paid non-clinical time to attend the registrar education program at St John of God Midland Hospital.
- Accommodation is provided.
- Attractive remuneration.

This position is accredited with ACRRM for Advanced Skills Training in Emergency Medicine.

WA Rural Basic Physician Training - Adult Internal Medicine

Basic Physician Training (BPT) in Adult Internal Medicine (AIM) with the Royal Australasian College of Physicians (RACP) is the first step to becoming a Rural Specialist Physician.

Candidates successful in obtaining a WA Country Health Service Service General Medicine Registrar contract at listed sites are welcome to apply for a Basic Physician Training (BPT) Adult Internal Medicine (AIM) Year 1 training position via the [2026 WACHS Rural Physician Training Pathway](#).

WA Country Health Service sites offering placements include:

- Albany
- Broome
- Bunbury
- Kalgoorlie
- Geraldton

If you are interested in becoming a rural physician and want to know more about Basic Training or Advanced Training in WA Country Health Service please contact the Physician Training team on 08 6391 0647 or WACHS.BPT@health.wa.gov.au.

General Medicine Advanced Trainee, Albany

Successful candidates will be responsible for the clinical care of general medicine patients at Albany Health Campus under the supervision of experienced physician consultants. One role will be primarily responsible for managing an inpatient team including managing inpatient referrals to general medicine. The other role will be primarily responsible for managing outpatients including fast track outpatient referrals, general medicine clinics, Hospital in the Home and hospital avoidance strategies.

There will be opportunities to deliver outpatient clinics across the region. These roles will rotate to enhance exposure to a wide breadth of clinical conditions and training opportunities. You will participate in the on-call roster approximately once weekly for acute undifferentiated patients admitted to general medicine from the Emergency Department supervising junior doctors admitting to our “virtual” acute medical unit.

Our dynamic and committed team of physicians and senior medical practitioners have created a collegiate culture of patient centred care with a strong focus on the health experience of patients and the professional development of staff. There are opportunities to participate in research and complete college research project requirements. We have on-site radiology with clinical radiology meetings and a strong culture of teaching and learning. You will participate in quality improvement activities including clinical audit and antimicrobial stewardship working closely with consultant physicians.

Albany Health Campus, the regional resource centre for the Great Southern, has one accredited position for Advanced Training in General Medicine. These are 12 months positions, and six-month applications will be considered.

08 9892 2682

Successful candidates will be responsible for the clinical care of general medicine patients at Albany Health Campus under the supervision of experienced physician consultants.

The service registrar roles deliver high quality, continuously improving, patient-centred care within well supported, physician-led, general medicine training teams. The roles are accredited for general practice, ACRRM, intensive care and RACP basic trainees who are seeking exposure to diverse range of acute undifferentiated presentations in medicine and longitudinal care with Hospital in the Home and medical outpatient services. The role is focussed on managing inpatients, Hospital in the Home, hospital avoidance and general medicine outpatient clinics. There is the potential for radiation oncology experience.

Service registrars also manage a team of junior medical staff and work collaboratively as part of a multidisciplinary team. There is a strong focus on teaching as well as opportunities for research and quality improvement activities, with allocated non-clinical time.

The position requires participation in the acute undifferentiated on-call roster, with after-hours responsibilities approximately weekly. Applications for six or 12 months will be considered.

General Medicine Advanced Trainee, Broome

Trainees are based in Broome, but provide outpatient clinics and inpatient support throughout the Kimberley region in hospitals, remote community clinics and Aboriginal health services, spending up to a third of their workdays outside of Broome, travelling by road and aircraft (including light aircraft).

Successful applicants will hold current registration as a medical practitioner with Australian Health Practitioner Regulation Agency and be eligible for Advanced Training in General Medicine in 2023 (including successful completion of RACP Part 1 and Part 2 exams). Subspecialty advanced trainees doing dual training in general medicine are strongly encouraged to apply.

These positions provide a fantastic opportunity to gain extensive experience in rural and remote medicine, Aboriginal health, and community based medicine in addition to continual experience in hospital medicine. Majority of patients have multiple complex chronic comorbidities, including conditions such as rheumatic heart disease, autoimmune disease and some infectious diseases rarely encountered in tertiary hospital settings.

Supervision is provided by experienced general medical consultants, whose special interests include respiratory medicine, diabetes, rheumatic heart disease, viral hepatitis, and obstetric medicine. There are also visiting subspecialists (cardiology, nephrology, rheumatology and dermatology).

You will become part of a close-knit team that works closely with primary care providers and multidisciplinary hospital teams. There are opportunities to undertake clinical audit and/or research projects.

The two positions are accredited for up to 12 months of advanced training in general medicine, though applications for six months will be considered if necessary. Out of hours work is minimal, providing excellent opportunities to enjoy the beautiful Kimberley environment outside of work.

Dr Justin Barton
Consultant General Physician and Head of Department
krpt@health.wa.gov.au

General Medicine Advanced Trainee, Bunbury

Bunbury Regional Hospital is the regional resource centre for the South West and is accredited by the Royal Australian College of Physicians (RACP) for two positions of advanced training in general medicine. These are 12-month positions.

Bunbury Regional Hospital is the largest hospital outside of metropolitan Perth. It is co-located with St John of God Bunbury Hospital and offers the full range of medical disciplines. The general medical department manages a total of 64 beds across two wards plus any additional outlying patients. You will have an opportunity to provide care and support to patients experiencing a wide range of conditions, largely managed by a general physician cohort.

Advanced trainees in general medicine work alongside the consultant physician group and interface with other specialties particularly, but not limited to, emergency, intensive care, cardiology, renal, respiratory and geriatrics. The role includes inpatient and outpatient management, supervision and teaching of doctors in training (service medical registrars, resident medical officers and interns) and participation in safety and quality, and quality improvement activities.

Advanced trainees are generally rostered on Monday to Friday day shifts. Participation in the after-hours roster may be negotiated with consultant backup.

A \$451 million redevelopment project is set to transform Bunbury Regional Hospital into one of the most modern and biggest in regional WA, reflecting its role as an important community healthcare hub for the entire South West region.

The transformation project includes:

- Expanded emergency department
- Expanded maternity, birthing, and neonatal services
- Increased operating theatre capacity
- New clinical equipment
- New emergency access mental health facilities
- WA's first regional training, education and research centre
- Boosting of digital capability and so much more

General Medicine Service, Bunbury

General medicine at Bunbury Regional Hospital manages patients across two wards encompassing 64 beds. General physicians are responsible for leading five medical teams and working within a multidisciplinary framework of care. Service medical registrars are integral to the team and work closely with the consultant group, advanced trainee(s) and other doctors in training (resident medical officers and interns).

Working under consultant supervision, clinical responsibilities include managing new referrals and existing inpatients within general medicine. Duties include full history taking and examination, ordering and follow-up of appropriate investigations, liaison with patients, family, and other healthcare providers. Non-clinical opportunities are encouraged and include participation in safety and quality and quality improvement activities.

Successful candidates are required to be eligible for registration with AHPRA and have a minimum of six months experience in a general medicine setting. This may be from within Australia or a comparable jurisdiction.

Bunbury Regional Hospital is currently accredited by the Royal Australasian College of Physicians for 12 months of Basic Physician Training and will be part of the WA Country Health Service Physician Training Network for candidates interested in pursuing a career as a rural physician from 2026.

A \$451 million redevelopment project is underway, set to transform Bunbury Regional Hospital into one of the most modern facilities in regional Australia.

Successful candidates will be responsible for providing clinical care to patients referred to or admitted to the general medical service. Registrars are important members of our four medical teams and are under the supervision of consultant physician staff.

One position is being advertised for an advanced trainee in adult general medicine. We are currently accredited by the RACP for one-year advanced training position for the suitable candidate.

This position will provide a broad level of medical experience for junior doctors completing their advanced training in general medicine. Geraldton Health Campus has been accredited by the RACP as a Level 1 Teaching Hospital for Basic Physician Training and for one-year advanced training in adult general medicine but is not part of official metro BPT/advanced training programs.

There are multiple positions available for service medical registrars.

Geraldton Health Campus has four medical teams, each managed by an FRACP fellow consultant, registrar and junior doctors. Teams are responsible for inpatient and outpatient medical care including caring for patients in the High Dependency Unit, Hospital in the Home, renal dialysis and oncology services. In addition, medical teams provide a high level of support to complex surgical and orthopaedic inpatients and other services. Roster commitments are rotational to cover 24/7 medical service.

General Surgery Service, Bunbury

Bunbury's day procedures and theatre areas provide consultant surgical and anaesthetic services for the specialties of general surgery, obstetrics and gynaecology, ophthalmology, urology, orthopaedics, plastics, ear, nose and throat, emergency and trauma.

The surgical ward currently has a bed capacity of 30, catering for patient recuperation from surgical procedures, small day procedures and DP23 unit. Outpatient clinics are also run as part of this directorate. Successful registrars will be required to work with consultants in the efficient delivery of key performance indicators, surgical admissions and care, timely and efficient discharge planning and communications.

In conjunction with two SET general surgical trainees, service registrars will participate in on-call, ward and theatre duties both on site and in other regional centres. Involvement in teaching, research and audit is encouraged in our department.

Bunbury Regional Hospital is recognised as a rural posting in general surgical SET application points in the future.

Applicants with at least six months surgical experience are preferred.

Applications are invited for the positions of Surgical Registrar within Bunbury Regional Hospital. The Surgical Department is a small but busy operating department and offers high quality, efficient surgical experience.

General Surgery Service, Geraldton

Applications are invited for the position of Surgical Registrar at Geraldton Health Campus. The Surgical Department is a small and busy operating department offering high quality, efficient surgical experience.

For more information

Mr Jacques Perry
Director of Surgery
perryperry@bigpond.com

Midwest Medical Workforce Unit
medicalservices.WACHSMidwest@health.wa.gov.au

Successful registrars will be required to work with consultants in the efficient delivery of key performance indicators, timely discharge summaries and efficient discharge planning. The day procedure and theatre areas provide consultant surgical and anaesthetic services for the specialties of general surgery, obstetrics and gynaecology, urology, orthopaedics, plastics, ear, nose and throat, emergency and trauma.

This full-time position commences in February 2026 for 12 months. Longer term contracts may be negotiated. Applicants with at least six months of surgical registrar experience are preferred.

Successful candidates will be responsible for the clinical care of patients under the supervision of senior medical staff including:

- Attending to patients in order of medical urgency, taking a history and full medical examinations and arranging appropriate investigations for new admissions.
- Assisting with surgical procedures as required.
- Managing medical conditions according to acceptable clinical standards under supervision of consultants.
- Collaborate with other medical and nursing staff as well as multidisciplinary team members to facilitate patient management and communication with family, outside medical practitioners, and/or community services.
- Teaching and supervision of resident medical officers and interns attached to the unit.

General Surgery Service, Kalgoorlie

Kalgoorlie Health Campus has three general surgeons, one orthopaedic surgeon and seven registrars. The roster is varied and flexible, with opportunities for out of hours and weekend work.

Work involves emergency consults in the Emergency Department, emergency theatre, daily clinics and daily theatres. Theatre work includes a broad range of open and minimal access general surgical cases and abundant upper and lower GI scope lists. This template offers excellent operative experience in a supervised capacity.

There are three interns and one resident medical officer supporting the department.

The service registrar role provides exposure to a broad range of general surgery and orthopaedic work including minimally invasive procedures and endoscopy work.

Amanda Ryan
Medical Administration Officer
amanda.ryan2@health.wa.gov.au
08 9080 5802

General Medicine Service, Kalgoorlie

Kalgoorlie Hospital
Kalgoorlie Health Campus is accredited by RACP for Basic Training & Advanced Training. In addition to General and Acute Care Medicine, there is potential for Infectious Diseases experience.

Kalgoorlie Health Campus is a 106-bed inpatient facility and one of the largest regional hospitals in WA. The successful candidates will be responsible for the clinical care of general medicine patients at the Kalgoorlie Health Campus under the supervision of experienced physician consultants.

The Service Registrar roles deliver high quality, patient-centred care within well supported, Physician-led, general medicine team.

The General Medicine unit is responsible for managing Acute and chronic general medical conditions such as chest pain, stroke, sepsis, anaphylaxis, DKA to name a few with approximate 5-12 admissions per day. It is also responsible for managing Chemotherapy, Dialysis, Day Procedure Ward, Palliative Care and Telehealth Consults. The Medical Ward has 5 four bed-rooms, 7 single rooms and 3 Palliative Care rooms. There are 6 beds in the High Dependency Unit with opportunities to learn a wide variety of acute medicine and procedures. There is also an active ambulatory care service with clinics every day of the week for General Medicine, Rheumatology, Diabetes, Rapid Access and Infectious diseases.

Amanda Ryan
Medical Administration Officer -
amanda.ryan2.wa.gov.au
08 9080 5802

General Medicine, Northam

This position provides ample exposure to adult rural medical inpatients and internal medicine procedures. The fully supervised and supportive department is staffed by consultants in general medicine, geriatrics, oncology, cardiology, palliative care and rehabilitation medicine. The medical unit is also staffed by experienced senior medical practitioners and junior medical officers seconded from metropolitan hospitals. The Inpatient Unit consists of 38 beds.

This role will be both challenging and rewarding and you will be presented with cases that you just won't see in a metropolitan setting. To be successful you will need to hold AHPRA registration and be able to demonstrate a minimum of six months prior experience in internal medicine and/or other medical subspecialty.

Northam is an attractive rural town located 100km from the Perth CBD in the picturesque Avon Valley. Northam Health Service is the main hub hospital in the Wheatbelt, which is home to approximately 70,000 people and farming communities.

Benefits of working at Northam Health Service include:

- A broad exposure to issues inherent in rural medical practice.
- Adequate levels of supervision compared to metropolitan sites which will encourage clinical leadership and foster independent practice.
- Opportunity to be involved in the education of medical students from the rural clinical school in Northam and junior medical officers.
- Opportunities to engage with education available onsite, through WA Country Health Service, Medical Education Unit and metropolitan hospitals
- Accommodation is provided.
- Attractive remuneration.

This position is accredited with both ACRRM and RACGP for Advanced Skills Training in Internal Medicine.

Dr Anna Varone
Clinical Lead
anna.varone@health.wa.gov.au

Intensive Care Service and Trainee, Bunbury

Bunbury's Intensive Care Unit (ICU) is accredited by the College of Intensive Care of Australia and New Zealand for Foundation and Rural training.

- Six registrars (trainees/service): six or 12 month positions for intensive care.
- One registrar (College of Intensive Care Medicine trainee) 12 month Specialist Training Program position with a six month rotation in anaesthetics.

All applicants must have a minimum of six months experience in critical care medicine at a registrar level (emergency, ICU or anaesthetics), with a preference for candidates who have experience from Australia or a comparable health system.

The Specialist Training Program (STP) role is available to an ICU trainee registered with College of Intensive Care Medicine (CICM) of Australia and New Zealand. The position offers six months experience in critical care medicine and a guaranteed six months of accredited training time in anaesthesia.

Bunbury Regional Hospital is accredited for Australian Medical Council Work-based Assessment (WBA) for eligible applicants, however hospital-based rotations in general medicine, surgery and emergency medicine for full general registration is not a component of this post and cannot be subsequently guaranteed. Please note the waiting list for acceptance to the Bunbury-based WBA program is estimated to be minimum of one to two years.

Intensive Care (Transition Year Fellow), Bunbury

The Transition Year (TY) position provides the opportunity for trainees to work alongside ICU specialists in the day-to-day running of the unit while having access to immediate ICU specialist support and supervision as required. It is expected that the TY trainee will fully meet the objectives as detailed within the CICM T-26 guideline.

ELIGIBILITY

Essential registration, license or qualification requirements:

- MBBS or equivalent.
- AHPRA general registration.
- CICM Second Part Examination.
- Satisfactory completion of all prescribed courses, learning packages and WBA.
- Submission of Formal Project (or proof of near completion).
- Satisfactory completion of the required clinical training time and assessments for the core intensive care medicine, anaesthesia and medicine years (or proof of anticipated completion prior to commencement of transition year).

Other essential requirements:

- Seniority which enables management of junior medical staff and ICU team.
- Seniority and experience which enables teaching of junior staff.
- Airway and crisis management skills to enable autonomy in the role.
- Excellent understanding and practice in techniques and procedures associated with advanced respiratory, cardiovascular and renal support.
- Excellent communication skills both within and outside of the ICU.
- Prior exposure to non-clinical/management roles.

Desirable requirements:

- Independent skills in the following are beneficial though can be developed further during the transition year:
 - Flexible bronchoscopy
 - Echocardiography
 - Tracheostomy
 - Clinical research programs

Bunbury Regional Hospital ICU is a progressive Level 2 ICU. It is an eight-bed unit that sees over 600 admissions per year and is dedicated to the management of patients with life-threatening illnesses, injuries and complications.

We are able to provide mechanical ventilation, renal replacement therapy and invasive cardiovascular monitoring for an indefinite period. In addition, we support the South West Health Campus with a medical emergency response team and provide an outreach service to Bunbury Regional Hospital.

Obstetric and Gynaecology Service, Bunbury

Six or 12 month full time appointments (80 hours per fortnight) commencing in February and August 2026.

The service registrar role provides unique exposure to a broad variety of general obstetrics and gynaecology.

The department has six consultant obstetricians and gynaecologists, four to five registrars, with regional GPOs on the out of hours roster. The roster includes one in four to five weeks of four night shifts and one in four weekends on-call.

Work involves ward and labour ward, high risk antenatal clinics, maternity assessment unit and emergency consults in ED. You will be the first responder and review and manage patients as indicated under direct or indirect supervision by consultants.

The unit has accreditation to train for Certificate in Women's Health, basic and advanced DRANZCOG. The department is proud of its culture of hands-on and clinical teaching. There is joint obstetric and paediatric maternity and mortality meeting, gynaecology M&M and imaging meetings. Furthermore, the department is actively involved in the teaching of medical students at the Rural Clinical School.

Medical Administration Trainee, Broome

We are seeking a motivated Medical Administration Registrar to join our team at Broome Health Campus. The service is entering an exciting period of growth and transition, with planning well underway for service expansion and redevelopment.

The Medical Administration Registrar will work with the specialist (FRACMA) Director of Medical Services at Broome Health Campus to provide professional leadership as well as guidance in relation to strategic and operational projects as required, with a particular focus on clinical governance, accreditation, service development and general medical administration duties.

This is an accredited Specialist Training Position. The Medical Administration Registrar must be enrolled as a trainee with the Royal Australasian College of Medical Administrators (RACMA) to satisfy the selection criterion of demonstrated commitment towards training as a specialist medical administrator.

Applicants must hold General AHPRA registration, have a minimum of four years of clinical experience and be currently enrolled as a trainee in the RACMA specialist training program for the 2025 training year.

This position provides a unique opportunity to contribute to the development of a regional health service. Registrars will be involved in the care of paediatric inpatients and neonates from 37/40 at Albany Health Campus.

Outpatients will include medical and developmental paediatric clinics with appropriate consultant input and supervision. There is also the potential to contribute to outreach clinics in Katanning.

Registrars will be closely supervised by on-site paediatricians from 8am to 4pm, Monday to Friday.

Teaching opportunities include local grand rounds and teaching sessions as well as video conference links available to Perth Children's Hospital (PCH) for registrar teaching.

The Albany Health Campus Paediatric Service registrar position is accredited for ACCRM training.

Paediatric Medicine Service, Geraldton

The registrar role at Geraldton Health Campus' paediatric department will involve:

- Inpatient paediatric ward.
- Minimum of three clinics per week, with a mix of developmental, medical and outreach.
- Weekly clinic at Geraldton Regional Aboriginal Medical Service (GRAMS).
- Provision of regional outreach clinics to Burringurrah, Carnarvon, GRAMS Gascoyne Outreach Service (GOS), Exmouth, Meekatharra, Mt Magnet, Morawa and Mullewa.
- Inpatient neonates at Geraldton Health Campus, deliveries from 34/40, level 2 Special Care Nursery, including CPAP, and supported by Western Australia's Neonatal Emergency Transfer Service (NETS).

There is a total of six beds on the paediatric ward, with an annual paediatric admission of 900. There are between 450 - 500 deliveries per year.

The paediatric team at Geraldton Health Campus consists of four consultant paediatricians, six registrars, two resident medical officers, including one Community Residency Program (CRP) and one intern. Registrars contribute to an overnight on-call roster (one per week with consultant back up) and weekend coverage.

There is on-site consultant supervision for inpatients and outpatients, and numerous online resources, including the Rural Child Health Training Module run through Victoria, the teaching through State Child Development Centre and video conference links with PCH.

Geraldton Health Campus is accredited for up to 12 months training, with general and rural training with a perinatal component, and with six months developmental and psychosocial training if the candidate takes a 12-month attachment.

The position is also accredited for ACRRM trainees.

The team is supportive for the registrar to complete RACP clinical foundation in palliative medicine (formerly known as a diploma) and the opportunity to participate in statewide palliative care events.

We welcome you to be part of the Great Southern Palliative Care team based at Albany Health Campus. In this role, you will have the opportunity to develop your palliative care skills in a supported environment, with plenty of opportunity to see patients alone, make decisions and hone your clinical skills.

You will work in a multidisciplinary team including medical, nursing, allied health, social work, spiritual care and Aboriginal care workers in a supportive environment.

Learning opportunities include inpatient consultation, hospice inpatient care, community home visits and MDT meeting involvement.

Experience life in the Goldfields

Kalgoorlie is Australia's largest outback city, and the heart of WA's Goldfields region - Australia's gold capital. The area is more than three times the size of Victoria and covers almost a third of WA's total land mass.

As the largest region in WA, its diverse natural environments range from sprawling deserts in the north and east to pristine white beaches and emerald seas in the south.

With a population of more than 30,000 people, the city is a dynamic and sophisticated regional centre and has many chain stores and services. Sport facilities, clubs and societies and social services abound to support a good work-life balance.

Community is a key strength of the town. Being located inland, the weather in Kalgoorlie is usually sunny, giving options to explore the outback and beach-side Esperance during your time off.

Kalgoorlie Health Campus is a 100-bed inpatient facility and one of the largest regional public hospitals in WA. When you join the team at Kalgoorlie Health Campus, you'll become part of a close-knit community of health professionals including specialist general physicians, surgeons, paediatricians, obstetrician gynecologists and emergency medicine doctors.

The hospital supports medical students through the Rural Clinical School, junior doctors rotating from Perth, Workplace Based Assessment doctors and registrars across a number of specialties.

Our regional hospitals include Kalgoorlie Health Campus and Esperance Health Campus.

Learn more about [Working in the Goldfields](#).

Experience life in the Great Southern

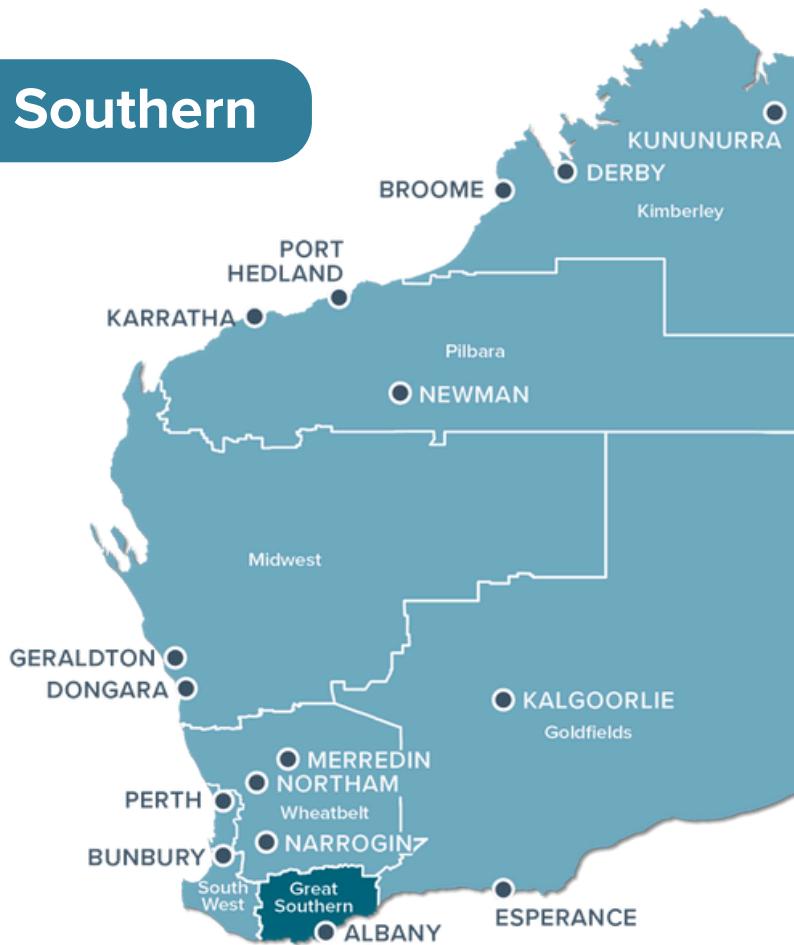

The Great Southern is WA's most southern region, bordered by the South West, Wheatbelt and Goldfields regions.

Albany is a scenic port city located approximately 400km south of Perth, perched on the Southern Ocean and facing Antarctica. There is plenty to explore outside of work and many outdoor activities to embrace such as sailing, fishing, surfing, cycling, swimming and bush-walking. There are also spectacular walks and views found throughout the Porongorup Range and Stirling Range National Parks, where the iconic Bluff Knoll humbly resides. The Bibbulman and Munda Biddi Trails also meander through the Great Southern region and past the Valley of the Giants in Walpole.

A vibrant restaurant/café and arts scene contributes to the attractive lifestyle on offer.

Albany Health Campus is a state-of-the-art facility that provides health care to more than 59,000 of the region's local residents and visitors. As the main regional hospital, Albany Health Campus also supports the region's smaller hospitals to provide improved clinical services to residents closer to home.

Albany Health Campus has 81 overnight, 31 same day and 16 inpatient mental health beds. This ensures the delivery of streamlined health services in a contemporary and innovative hospital, responsive service, care via collaborative working practices and quality assured patient services. The hospital has general and specialised services for a diverse case-mix along with highly motivated medical staff and many learning opportunities.

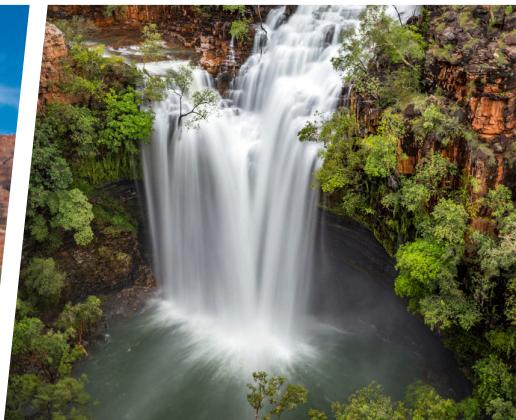

KEY

- Major towns
- Great Southern region

The main hospital in the Great Southern region is Albany Health Campus.

[Working in the Great Southern Region.](#)**

Experience life in the Kimberley

The Kimberley is the most northern region in WA. Internationally recognised for its unique and dramatic landscape, the region includes spectacular gorges, waterfalls and cave systems, and an astonishing variety of wildlife.

Broome Health Campus is a modern 60-bed hospital that provides healthcare to a resident population of 17,000 which expands to 55,000 during the tourist season. As the regional resource centre for the Kimberley, Broome Health Campus resident and specialist medical staff also provide services to hospitals, community and remote sites across the region.

Broome is also a gateway for travel, with direct flights to Singapore from April to October, eliminating the need to transit through Perth or Darwin. This opens up opportunities for further travel while remaining based in Broome. Additionally, as a Broome resident, you will be eligible for resident fares that are capped under Government regulation, making travel in and out of Broome more affordable, especially during peak tourist season.

The positions provide the opportunity to gain extensive experience in Indigenous health and ambulatory and community-based medicine. In addition to expanding knowledge and skills in hospital medicine, many patients have multiple complex chronic comorbidities including conditions such as rheumatic heart disease and infectious diseases rarely encountered in tertiary hospital settings.

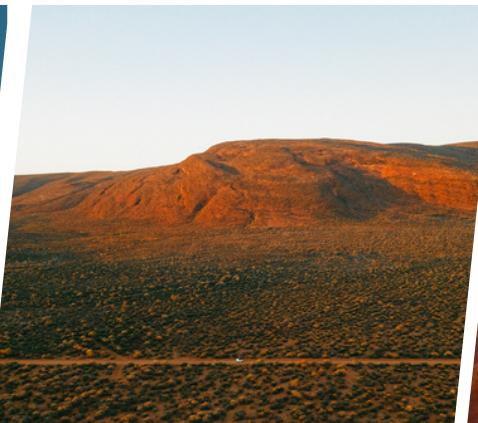

You will become part of a close-knit team that works with primary care providers and multidisciplinary staff to provide a high quality clinical service to all hospital patients. You will also have opportunities to undertake clinical audits and/or research projects.

Our hospitals in the region:

Broome Health Campus, Fitzroy Crossing Hospital, Derby Hospital, Halls Creek Hospital, Kununurra Hospital, Wyndham Hospital.

Read more stories about [Working in the Kimberley Region](#).

Experience life in the Midwest

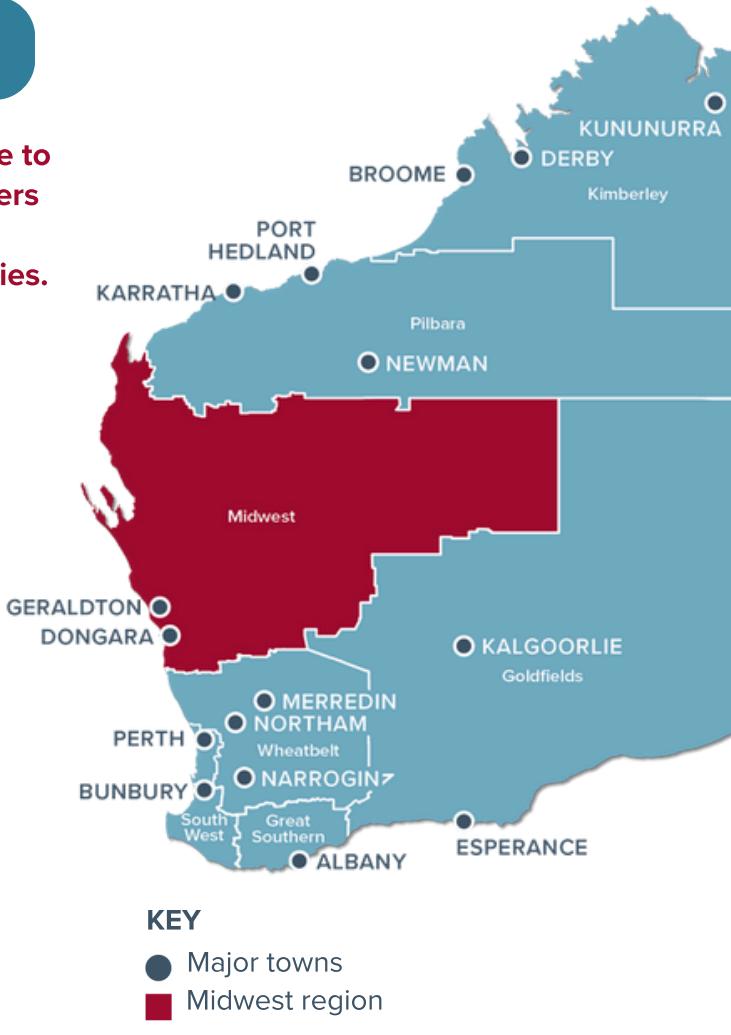

Geraldton is located 425km north of Perth and is home to one of the most attractive coastal centres in WA. It offers beachside living alongside rural life as well as a wide range of recreational, shopping and educational facilities.

Geraldton Health Campus is the major medical resource centre for the Midwest. The Emergency Department sees approximately 36,000 presentations per year including a large proportion of paediatrics and Aboriginal patients, with high activity and an admission rate of about 22 per cent. A highly varied case-mix will provide many opportunities to gain hands on procedural skills and a broad clinical experience. You will gain expertise in Aboriginal health as well as rural and remote practice.

Geraldton Health Campus has 100 hospital beds for acute medical, surgical, paediatric and maternity patients with a 24-hour Emergency Department, onsite chemotherapy and renal dialysis. It provides a comprehensive range of patient care services including medical imaging and pathology. Visiting specialists provide varied learning opportunities for junior doctors across a range of specialties.

The hospital has a strong association with the local Aboriginal Medical Service, St John of God Hospital and the general practitioner community. There are plans well underway for redevelopment of the emergency department and inpatient services. Midwest profiles are being strengthened across departments, making it an exciting time to join the service.

The hospital offers an excellent supported environment that exposes trainees to a spectrum of disease and practical learning opportunities.

Our hospitals in the region:

- Geraldton Health Campus
- Carnarvon Health Campus
- Exmouth Health Service
- Three Springs, Morawa, Mullewa and Northampton Health Centres

Experience life in the South West

The South West region is an area of magnificent beauty on the south west coast of WA. Stretching from Busselton along the shores of Geographe Bay down to Augusta, the most south-westerly point of Australia.

The area is blessed with spectacular and pristine beaches, abundant opportunities for outdoor activities such as cave exploring, adventurous walks and trails and world class surfing spots. It is also renowned for its divine cuisine, welcoming locals and award-winning wines in nearly every direction.

South West residents have a high sense of community and rate their region as a safe place to live and raise children, with excellent access to services such as health and education contributing to their positive lifestyle and general wellbeing.

Bunbury Regional Hospital is a 171-bed hospital that has all major specialties present on-site including ICU and CCU/cath lab. Functioning as the regional centre for the South West and being the only Emergency Department (ED) in Bunbury provides exposure to the whole spectrum of acute medical, surgical, paediatric, obstetric, gynaecological and mental health related illness.

The ED is the largest department in the hospital and the biggest in WA outside of Perth. It consists of 39 beds including ED ambulatory care and Short Stay Unit. The department receives in excess of 45,000 presentations per year of whom approximately 40 per cent require admission. Case-mix, including acuity and activity is highly varied. Our patients are younger than many tertiary sites with 25 per cent being children. Registrars generally have more opportunity for procedures than in metropolitan tertiary EDs. ED staff may assist with medical transfers on the Bunbury Rescue Helicopter. Training is highly rated by our trainees.

ED medical staff include specialist emergency physicians, senior medical practitioners, registrars, residents and interns.

Our hospitals in the region:

- Bunbury Regional Hospital
- Busselton Health Campus
- Margaret River Hospital
- Augusta, Bridgetown, Manjimup, Boyupbrook, Donnybrook, Collie and Harvey
