

POSITION DESCRIPTION

Trainee

Sydney
Local Health District

 Patient and Family Centred Care Our patients Our people Our culture OUR VISION <i>Excellence in health and healthcare for all</i> OUR CORE VALUES Collaboration Openness Respect Empowerment	
Organisation	NSW Health
Local Health District / Agency	Sydney Local Health District
Position Classification	JMO Trainee
State Award	Public Hospital Medical Officers (State) Award
Category	Medical Officers Intensive Care Medicine
Vaccination Category	Category A
Website	www.slhd.nsw.gov.au/

PRIMARY PURPOSE

This position can be applied by both Trainees and Advanced Trainees for CICM.

This position is appropriate for medical officers (PGY 4 and above) who are interested in training in intensive care medicine. Trainees will either be registered with, or in the process of applying to, the College of Intensive Care Medicine (CICM). The position is suitable for trainees at all stages of their training and based on clinical experience and level of training, the ICU will then determine the most appropriate clinical role to align with the units' operational requirements and trainees requirements. Details provided below as applicable.

The purpose of the position is to provide effective clinical management and excellent care to critically ill patients under the supervision of an Intensive Care Specialist. Trainees will be expected to develop expertise in medical practice in a complex clinical environment, and to participate in the core training program of the College of Intensive Care Medicine.

Position Summary and Local Background

The Intensive Care Unit at Royal Prince Alfred Hospital is one of Australia's largest, and provides care to over 3800 patients admitted per annum to 52 beds. RPA is one of the two ECMO referral centers in NSW. Our service co-manages patients from all clinical departments at the hospital, including trauma, liver and renal transplantation and bone marrow transplantation units.

RPA ICU comprises 4 contiguous patient care areas: Two general ICUs, a cardiothoracic surgical ICU and a neurosurgical ICU. Rotations to Medicine, Anaesthesia, Acute Medicine, Paediatrics and Rural are available for CICM Trainees.

The roster incorporates equal experience in all of our units-general ICU, Cardiac and neurosurgical day shifts as well as night shifts. Trainees work a week on/week off roster with approximately two weeks of days for every week of nights.

POSITION DESCRIPTION

Trainee

Sydney
Local Health District

Sydney Local Health District's vision incorporates NSW Health Core Values and a commitment to equity, health improvement, timeliness and efficiency, recognising that evidence-based service delivery requires highly skilled and valued staff supported by research, education and state-of-the-art technologies.

Our strategic priority under this vision is our commitment to excellence in Patient and Family Centre Care. Staff are supported to ensure patients, their families and carers are considered as partners in care to achieve optimal patient outcomes and best possible healthcare experience.

RESPIRATOR USE

NSW Health workers may be required to use a respirator, as part of their appointment with NSW Health. Where a respirator is required for use, workers will be instructed in their safe use; including donning, doffing and fit checking. Staff may be required to complete fit testing to selected respirator/s to assess their facial fit/seal.

At all times when a health worker is required to use a respirator, the health worker must not have any facial hair present. Processes are in place to support workers that need to keep facial hair due to religious observance requirements and/ or health conditions.

ESSENTIAL CRITERIA

- MBBS or equivalent, currently registered or eligible for registration with the Medical Board of Australia.
- At least 3 years full time hospital experience.
- Current registration (or intending to apply for registration) as a trainee with the Australian and New Zealand College of Intensive Care Medicine.
- **The position can be applied for by both Trainees and Advanced Trainees of Intensive care medicine as per CICM.**
- Basic clinical experience as a medical officer and the ability to work under supervision and guidance of intensive care specialists.
- Clinical experience and competence in intensive care medicine.
- Cognitive and technical skills in intensive care medicine.
- Interest and/or experience in research studies and teaching.
- Willingness to attend mandatory orientation programs.
- To be employed by NSW Health you are required to provide evidence of vaccination to comply with the NSW Health Occupational Assessment, Screening & Vaccination against Specified Infectious Diseases Policy, this includes any amendments made from time to time.

Other requirements:

- Compliance with various legislative, policy/ protocol requirements relating to:
 - Must be registered or eligible for registration as a medical practitioner with the Australian Health Practitioner Regulation Agency (AHPRA)
 - NSW Code of Conduct
 - Local Health District and hospital requirements

KEY ACCOUNTABILITIES

- Contribute to the provision of intensive care services whilst developing greater clinical expertise and knowledge in intensive care medicine.

- Under appropriate levels of supervision, review patients for admission to intensive care, assess and manage patients within the intensive care unit and perform invasive and non-invasive procedures required for patient care.
- Participate in the provision of acute services to the wider hospital including where applicable the cardiac arrest team, outreach services and out of hours roster.
- Communicate patient-relevant information in a timely and clear manner to patients, their families/carers and all staff involved in the patient's care, to facilitate teamwork, timely information transfer, and hence ensuring quality patient care.
- Prepare and oversee accurate documentation in relation to patient care, whilst maintaining confidentiality and privacy, to ensure timely and efficient communication of patient information, and to ensure patient records are effective and accurate for current and future use.
- Teach and mentor other clinical staff, to ensure an optimal learning environment, promote growth and development of others, and to develop skills in teaching.
- Participate in the Department's quality assurance and education activities to ensure safety (freedom from harm), effectiveness (use of evidence-based therapy), efficiency (eliminating waste), patient centredness (taking account of the patient's real needs), timeliness (care provided when needed) and equitability (care independent of wealth, race, religion, or gender).
- Actively monitor and manage own mental and physical wellbeing, reporting concerns and seeking assistance when needed.
- Meet College training program requirements, participate in educational experiences, and actively seek to learn and obtain feedback in order to develop and understand your own skills, knowledge and capability; and therefore, to exercise judgement and know when to seek assistance.

KEY CHALLENGES

- Balancing mandated training and education requirements with service provision, within the limitations of a busy public health service.
- Working in a complex environment where there are competing priorities and strict deadlines. Maintaining a professional role and responsibility for patient care, in close liaison with supervising consultants.
- Being flexible with rostered duties and accommodating reasonable department service needs.

KEY RELATIONSHIPS

Who	Why
Clinicians	To enable positive working relationships whilst under supervision to facilitate professional development and learning in line with training requirements. To participate in discussion and decisions, escalate issues, propose solutions, receive guidance, and provide regular updates regarding patients and their management.
Patients and relatives	To communicate information regarding hospitalisation, treatment, and progress in a sensitive, timely, and clear nature as essential for optimal patient care and experience.

POSITION DESCRIPTION

Trainee

Sydney
Local Health District

SELECTION CRITERIA

1. Qualifications and experience commensurate with the Essential Requirements for the role.
2. Demonstrated time management and problem-solving skills in the clinical setting.
3. Demonstrated ability to work independently within a supervised complex clinical environment utilising excellent clinical skills, judgment and expertise.
4. Demonstrated verbal, written and interpersonal skills, with the capacity to vary communication style in line with the understanding of the needs of diverse audiences
5. Evidence of continued professional development and commitment to self-education, quality improvement, patient safety and risk management.
6. Demonstrated career goal to undertake further training in intensive care medicine and demonstrated aptitude for acute care medicine.

OTHER REQUIREMENTS

The role and its responsibilities are to be carried out in a manner that is consistent with all relevant delegations, policies, and procedures at both SLHD and NSW Health.

Expected Consistent with this all employees (both clinical and non-clinical) are:
