

POSITION DESCRIPTION

JMO Supervised Practice

Our CORE values
Collaboration Openness Respect Empowerment

Organisation	NSW Health
Position Classification	JMO Intern
State Award	Public Hospital Medical Officers (State) Award
Category	Medical Officers General
Vaccination Category	Category A
Website	www.health.nsw.gov.au

PRIMARY PURPOSE

The purpose of the position is to provide effective medical services to patients, while developing expertise and skills in medical practice, in a complex clinical environment in inpatients and outpatient areas in the public health organisation.

The medical officer will work as part of a multi-disciplinary team, under the supervision of senior medical officers. Responsibilities include:

- Coordinating and documenting the admission, management and discharge planning of patients seen in or admitted to their Unit within the Public health organisation.
- The day-to-day assessment and management of the patients in their Unit, communicating with them and their family the nature of their condition and its treatment.
- Communicate and co-ordinate care with the team, arranging consultation with other staff when appropriate

Ensuring all decisions concerning the patients are made in consultation with their immediate supervisor.

The Medical Officer will provide care to all patients according to Good Medical Practice: A Code of Conduct for Doctors in Australia and demonstrate ethical behaviours and professional values including integrity; compassion; empathy; and respect for all patients, society and the profession.

The Supervised Practice position is suitable for applicants eligible for provisional or limited registration seeking entry level experience, including international medical graduates. The purpose of this position is to provide medical graduates with a supervised practice position to meet the requirements of gaining general registration with AHPRA.

RESPIRATOR USE

NSW Health workers may be required to use a respirator, as part of their appointment with NSW Health. Where a respirator is required for use, workers will be instructed in their safe use; including donning, doffing and fit checking. Staff may be required to complete fit testing to selected respirator/s to assess their facial fit/seal.

At all times when a health worker is required to use a respirator, the health worker must not have any facial hair present. Processes are in place to support workers that need to keep facial hair due to religious observance requirements and/ or health conditions.

POSITION DESCRIPTION

JMO Supervised Practice

ESSENTIAL CRITERIA

- To be employed by NSW Health you are required to provide evidence of vaccination to comply with the NSW Health Occupational Assessment, Screening & Vaccination against Specified Infectious Diseases Policy, this includes any amendments made from time to time.

KEY ACCOUNTABILITIES

- Assist with the management of patients in order to provide high quality, safe, patient-centred care. This includes: coordinating admissions; performing and documenting patient assessments; screening patients for common diseases, provide care for common chronic conditions; formulating and implementing management plans; organising referrals and consultations; arranging common, relevant and cost effective investigations, and interpreting results accurately; prescribing medications safely, effectively and economically, including fluid, electrolytes, blood products and selected inhalational agents; recognising and assessing deteriorating and critically unwell patients who require immediate care.
- Safely perform a range of common procedural skills, as agreed with supervisors
- Perform basic emergency and life support procedures
- Ensure effective discharges occur for the patient, family and other caregivers and an adequate and timely discharge summary is provided to those involved in after care to ensure effective follow up and continuity of care of patients after discharge.
- Communicate clearly, sensitively and effectively with patients, their family/carers, doctors and other health professionals, to facilitate shared decision-making, timely information transfer, and hence ensuring quality patient care. This includes participating in effective handover of patient care, escalating issues to supervisors when required, and respecting patient confidentiality and privacy.
- Retrieve, interpret and record information effectively in clinical data systems (both paper and electronic), to ensure timely and efficient communication of patient information, and to ensure patient records are effective and accurate for current and future use.
- Participate in quality assurance, quality improvement, risk management processes, and incident reporting, to ensure that appropriate standards are maintained, gaps in meeting safety and quality standards are identified and raised
- Apply knowledge of the culture, spirituality and relationship to land of Aboriginal and Torres Strait Islander peoples to clinical practice and advocacy.
- Self-evaluate own professional practice, participate in educational experiences, and actively seek to learn and obtain feedback in order to maintain continuing professional development; and
- Understand your own skills, knowledge and capability and seek assistance appropriately.
- Comply with supervision requirements as set out by the Australian Health Practitioner Regulation Agency.

KEY CHALLENGES

- Balancing training and education requirements with the delivery of high-level medical care in a challenging, demanding and varying environment.
- Using effective communication skills with patients and families from many different cultural and religious backgrounds
- Effective time management and prioritisation
