Mildura Base Hospital

Dear Dr Nabrees Sinnalebbe,

Re: Expression of interest for a Hospital Medical Officer position

I am writing to express my interest in Hospital Medical Officer opportunities within the Mildura Base Hospital, with a preference for Emergency Medicine and Intensive Care. I am an experienced international medical graduate currently holding AHPRA Limited Registration, having passed the AMC MCQ and English language test, with a Level 2 supervision application in progress through Monash Health. My background includes extensive clinical experience across Emergency Medicine, Intensive Care, and perioperative surgical care.

Most recently, I completed supervised practice through the **Monash Health MiPreP program**, with rotations across the Emergency Department, Aged Care/Rehabilitation and Renal Ward. Working within the Australian system gave me direct exposure to local supervision structures, clinical handover, documentation standards and Cerner EMR. It also gave me a much clearer sense of what safe, team-based hospital practice looks like in this context, and I am keen to build on that foundation.

Before coming to Australia, I spent many years working in Emergency Departments and ICUs across Brazil, in settings ranging from resuscitation rooms and neuro ICU to COVID ICU. I have managed critically unwell patients across a broad range of presentations – medical, surgical, post-operative and trauma – and have worked through high-pressure periods including the COVID-19 pandemic surge. I also regularly supervised junior doctors in the ED, including stepping in to perform procedures where patient safety required it.

I know that coming into the Australian system as an IMG requires patience, openness and a willingness to work within a supervised framework – and I genuinely welcome that. I am looking for a team where I can contribute meaningfully from day one while continuing to learn and develop within Australian clinical standards. I would be very happy to discuss opportunities at your convenience.

Thank you for taking the time to consider this letter.

Kind regards,

Dr Deva Subasic de Azevedo
